

Prerequisites

- JS basics
<https://www.youtube.com/watch?v=W6NZfCO5Sik&pp=ygUhamF2YXNjcmlwdCB0dXRvcmlhbm3IgYmVnaW5uZXJz>
- Please create a new public repository <https://github.com/>
- Cypress installation
- Project setup <https://www.youtube.com/watch?v=F53rDUwiAbU&list=PLUDwpEzHYLu4jKg-rNSKH3aJeBinlPXp&index=2>

Tasks: Test Scenarios for Contact List Web App

Verify the functionality of a contact list web application using Cypress.

1. Sign Up as a New User
 - Navigate to the sign-up page and create a new user(<https://thinking-tester-contact-list.herokuapp.com/addUser>).
 - Fill out the sign-up form with valid user information.
2. Login to the Web App
 - Navigate to the login page (<https://thinking-tester-contact-list.herokuapp.com/login>)
 - Enter valid login credentials.
 - Verify that the user is successfully logged in and redirected to the application's main page.
3. Add a New Contact Record
 - Fill out the form with valid contact information.
 - Submit the form and verify that the new contact is added to the list.
4. Delete a Contact Record
 - Navigate to the contact.
 - Identify an existing contact and initiate the deletion process.
 - Confirm the deletion and verify that the contact is removed from the list.
5. Edit a Contact Record
 - Navigate to the contact.
 - Identify an existing contact and initiate the edit process.
 - Modify the contact information and save the changes.
 - Verify that the contact details are updated in the list.
6. Push Your Code to GitHub and Share the Link
 - Commit your Cypress test scripts to your GitHub repository.
 - Share the link to your GitHub repository for review.
